TML-3DG MULTI-LINE LASER

INSTRUCTION MANUAL

SAFETY

Read the following safety instructions before attempting to operate this product.

Keep these instructions in a safe place or store in the carry case for future reference.

SAVE ALL WARNINGS AND INSTRUCTIONS FOR FUTURE REFERENCE.

WARNING: Read and understand all instructions.

- Use the laser only with the specifically designated batteries.
- Store the laser out of reach of children and other untrained persons. Lasers are dangerous in the hands of untrained users.
- Use only accessories that are recommended for your model.

- Tool service must be performed only by qualified repair personnel. Repairs, service or maintenance performed by unqualified personnel will void the warranty. Only approved and authorised service technicians can carry out warranty repairs.
- Do not use optical tools such as a telescope or transit to view the laser beam. Serious eye injury could result.
- Do not place the laser in a position which may cause anyone to intentionally or unintentionally stare into the laser beam. Serious eye injury could result.
- Do not position the laser near a reflective surface which may reflect the laser beam toward anyone's eyes. Serious eye injury could result.
- · Do not use optical tools to view the laser beam.
- Do not set up the tool at a position where the laser beam can cross any person at head height.

- · Do not let children come in contact with the laser.
- Turn the laser off when it is not in use. Leaving the laser on increases the risk of staring into the laser beam.
- Do not operate the laser around children or allow children to operate the laser. Serious eye injury may result.
- · Do not remove or deface warning labels.
- Position the laser securely on a level surface.
 Damage to the laser or serious injury could result if the laser falls.

WARNING: Do Not Disassemble

The Laser.

There are no user serviceable parts inside. Disassembling the laser will void all warranties on the product. Do not modify the product in any way. Modifying the tool may result in hazardous laser radiation exposure.

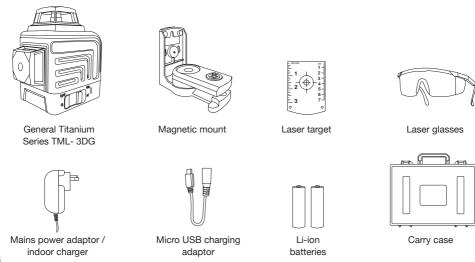

CAUTION: Class 2 Laser Product

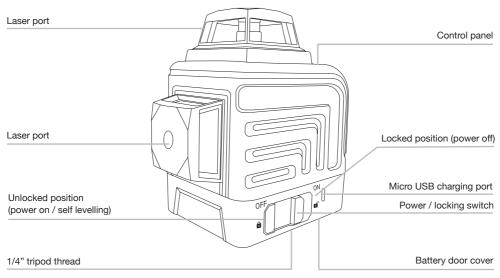

- Never look into the laser beam directly and intentionally.
- Do not use optical tools to view the laser beam.
- Do not set up the tool at a position where the laser beam can cross any person at head height.
- · Do not let children come in contact with the laser.

ITEM CHECKLIST

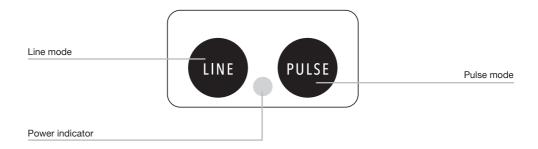

Please ensure the following items are included with your laser level. If anything is missing please contact your retailer.

LASER OVERVIEW

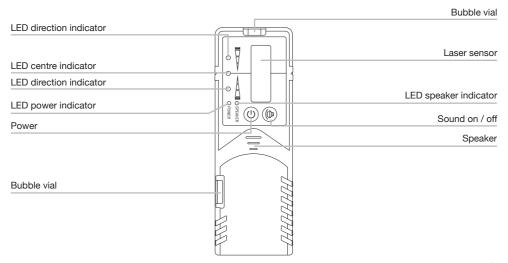

LASER OVERVIEW: CONTROL PANEL

DETECTOR OVERVIEW: FRONT

The detector is an optional accessory which can be purchased from your retailer.

USING YOUR LASER

POWER SUPPLY

- The instrument is supplied with two li-ion batteries as its power source.
- The instrument also has the ability to run using mains power as an alternative power source.

Inserting or replacing the li-ion battery

- · Open the battery cover door.
- Insert the li-ion battery according to polarity and close the battery door.

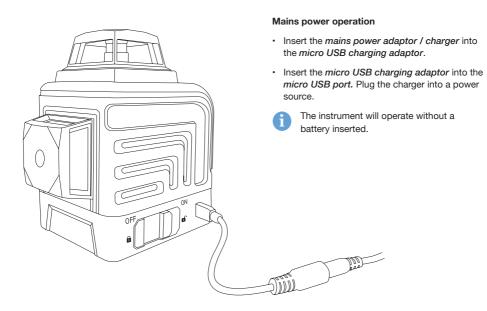

Charging the li-ion battery

- Insert the mains power adaptor / charger into the Micro USB charging adaptor.
- Insert the Micro USB charging adaptor into the micro USB port. Plug the charger into a power source. (See image on page 9).
- Charging time is approximately 5 hours for a depleted battery.

The instrument will continue to operate while the battery is charging however charging time will dramatically increase.

USING YOUR LASER (continued)

USING YOUR LASER (continued)

SET UP

- Select a place as close as practical to the work site. Ensure the location is clear of traffic.
- Place the laser on a level surface such as a bench or mount.

OPERATION

Powering on (self levelling)

- To turn the instrument on, slide the power / locking switch to the "on / unlocked" position.
 Self levelling will commence and the horizontal beam will activate.
- Press the line mode button on the control panel to cycle through the active beams.

 If the instrument is outside the self levelling range the instrument will not level causing the laser to beep and the beam to flash on and off repeatedly.
 If this occurs, reposition the instrument onto a level surface until the instrument can level off.

Powering off (self levelling)

 To turn the instrument on, slide the power / locking switch to the "locked" position.

USING THE MAGNETIC MOUNT

Mounting onto a magnetic surface

- Attach the instrument to the mount using the 1/4" thread.
- Attach the mount to a metal surface, ensuring that the mount has a strong hold before releasing your hands.
- Rotate the plate to position the instrument as desired.

Mounting via screw fixing points

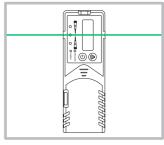

- Attach the instrument to the mount using the 1/4" thread.
- Fix a screw into a secure surface and hook the mount over the screw. Ensuring that the mount has a strong hold before releasing your hands.
- Rotate the plate to position the instrument as desired.

Mounting onto a tripod

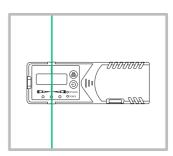

- Attach the mount onto the tripod via the 5/8" or 1/4" thread.
- Attach the instrument to the mount using the 1/4" thread.
- Rotate the plate to position the instrument as desired.

USING YOUR DETECTOR

- Press the pulse mode button on the top of the instrument to enter into pulse mode.
- Switch the detector on by pressing the power button. The speaker will beep indicating the instrument is operating.
- · Move the detector into the path of the laser beam.
- Hold the detector upright for horizontal beams.
 Rotate the detector 90° for vertical beams.
- The LED direction indicators will indicate the position of the laser beam. The centre LED will indicate alignment with the beam.
- The detector is an optional accessory which can be purchased from your retailer.

TROUBLE SHOOTING

Error	Cause & Solution				
Laser does not turn on	 Check the battery. It may be in the wrong way or need replacing. Check the battery compartment for signs of damage. Ensure it is clean and not bent. 				
Laser does not remain on for long periods of use.	 Check the battery. Check the battery compartment for signs of damage. Ensure it is clean and not bent. 				
Laser does not level off	 Instrument may be outside its self levelling range. Adjust the instrument or tripod so it is level. Instrument may have impact damage. 				

CARE AND MAINTENANCE

- This is a precision measuring instrument and should always be handled with care and transported within the carry pouch provided.
- Always slide the power / locking switch to the "locked" position when transporting the instrument or moving around the job site.
- Whenever possible, store the instrument in a dry, shady location.
- Calibration of the instrument is recommended: every six months, if ongoing accurate levelling is required, or an impact has occurred.

- The operator should check the accuracy of the instrument before precision levelling is attempted.
 Failure to do so may result in inaccurate measurements.
- Clean the instrument with a dry, soft cloth after use in dusty, damp or wet conditions before storing.
- Smudges and fingerprints may be removed with a damp tissue or a soft, lint-free cloth.

WARRANTY

3 YEAR STANDARD WARRANTY PERIOD

- 1. The warranty period for your tool is 3 years from the date of purchase.
- The warranty period for batteries, battery packs and chargers is 1 year from the date of purchase.
- Calibrations are not covered under warranty as they are deemed wear and tear.
- All products have a standard warranty period, you do not have to register your products to obtain the standard warranty period.
- To claim under this warranty, the date of purchase of the tool must be documented by an invoice/ receipt.
